# SEWER SYSTEM DISTRIBUTION CREDIT CALCULATION

## REDMOND SERVICE AREA

### SEWER SYSTEM DISTRUBUTION CREDIT

Residential (Plats/Short Plats)	Cost* divided by number of lots in plat = credit per lot
Multi-Family Residential and Mobile Home Parks	Cost* divided by total number of units** multiplied by the number of units per building = credit per building
Commercial Developments, Structures & Buildings	Cost* divided by the sum of the meter flow factors multiplied by the individual meter flow factor per building = credit per building**

\*Total improvement cost, less any reimbursement agreement repayment amounts. Credit shall be given for sewer improvements which consist of sewer mains, manholes, and pump stations that become part of the City-owned and operated system. Actual Credit not to exceed maximum distribution credit allowed as stated on front table.

\*\* Non-residential uses in a multi-family development or mobile home park such as recreation buildings and laundry shall be converted into equivalent multi-family units in the amount of the meter flow factor. These equivalent units shall be added to the actual number of units and this sum shall be the adjusted number of units/spaces for which the sewer credit is applied.

METER FLOW FACTOR CHART	
Meter Size	Factor
5/8" x 3/4"	1
1"	2.5
1-1/2"	5
2"	8
3"	16
4"	25
6"	50
